

WHITESTAR

Sound Absorbing

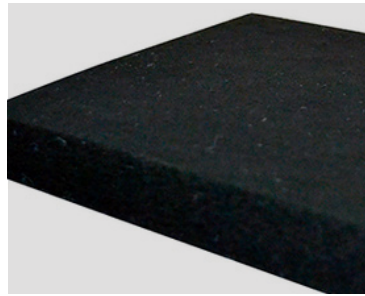

Marvinacustica **WHITE** are high performance sound absorbing panels designed to reduce acoustic reverberation and create quieter and more relaxing interior environments. Consisting of sound absorbing glass fibre in white painting finishing, they are easily fitted to walls and ceilings.

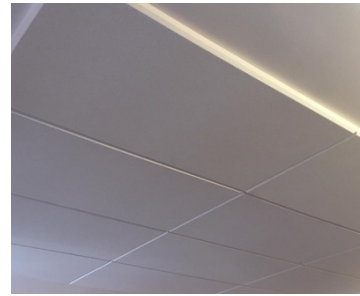

MARVINACUSTICA
Less noise, **better life.**

Ceiling spaced panels.

Inner material polyester fibre.

Ceiling bonded panels.

UTILIZATIONS

WHITE absorbers are the ideal product to correct the problems of reverberation. Adaptable to any building type: restaurants, pizzerias, bars, offices, meeting rooms, lobby, listening rooms, music rooms, professional offices, waiting rooms, etc. **WHITE** sound-absorbing panels have been tested in our laboratory. We can supply test reports on request.
